DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I - Claims 23-38 and 47-60 in the paper filed February 1, 2005 is acknowledged.

Claims 39-46 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the paper filed February 1, 2005.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 25-38 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 3, 4, 9-11, 5-7, 12-15 of prior U.S. Patent No. 6,673,013. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 23, 24, 47-60 and 24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4, 25, 38, 27-37 of U.S. Patent No. 6,673,013. Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between the instant claims and the claims of the patent lies in the fact that the patent claims include more elements and is thus more specific. Thus, the invention of the patent claims is in effect a "species" of the "generic" invention of the instant claims. It has been held that the generic invention is "anticipated" by the "species". See *In re Goodman*, 29 USPQ 2d 2010 (Fed.Cir. 1993).

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 24 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Vierra et al (6,017,304). Vierra shows a device for use in cardiovascular surgery comprising a stabilizing member including at least one contact member 15 adapted to engage a surface of a beating heart, and at least one exposure member 17 operable in concert with the contact member to reposition a portion of the heart.

Claims 23 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Borst et al (5,836,311). Borst shows a device for use in cardiovascular surgery comprising a stabilizing member including at least one contact member 22 adapted to engage a surface of a beating heart, and at least one exposure member 27 operable in concert with the contact member to reposition a portion of the heart (column 6, lines 35-40).
